## PROFESSIONAL EXPERIENCE

### Director of Digital Services
Brandthropology Inc
*Burlington, VT*
May 2018 - Present

· Maintained and developed websites running on various CMS systems including WordPress, Drupal 7, MODX and Big Commerce.
· Managed and maintained 12 different Linux servers that hosted websites for our clients, using both NGINX and Apache web servers.
· Developed and enforced procedures, responsible for increasing productivity, security and improving our on-boarding process.
· Wrote, maintained and aggregated developer documentation, setting up an internal "wiki" service.
· Handled Google Analytics setup, management, alongside general SEO analysis.
· Managed and coordinated effort between 4 external teams.
· Helped implement Jenkins server automation software to handle commonly repeated tasks.
· Delivered pixel perfect websites based directly on design mock ups.
· Set up SSL certificates for our client websites using Lets Encrypt.
· Set up and managed DNS for our client and internal websites.
· Presented ideas and training to various stakeholders and potential clients.
· Performed general database maintenance and management.
· Mentored junior developers, utilizing pair programming.

### Front End Web Developer
Higher Turnover Websites
*Shelburne, VT*
May 2017 – February 2018

· Designed and developed 8 new themes for client templates.
· Designed and developed Carsalesmanwebsites.com, a standalone site to promote our car salesman packages.
· Optimized our internal API to allow for easier customization of themes and reduced maintenance. This resulted in the removal of 190,000 lines of code.
· Implemented a SASS based styling system, which enabled us to apply styling changes across all of our client themes in a consistent manner.

### Contact Center Agent
Vermont Teddy Bear
*Shelburne, VT*
January 2014 - May 2014

· Learned internal ordering system while taking calls from a variety of different clients.
· Dealt with problems as they arose, learned to deal with multiple moving parts.
